EXPERIENCE MEETS PASSION

CarboLife develops and manufactures high-quality products from innovative composite materials, based on our many years of scientific experience. We have acquired our expertise in practical, lightweight construction through years of engineering work in projects for the aerospace, automotive and shipping industries.

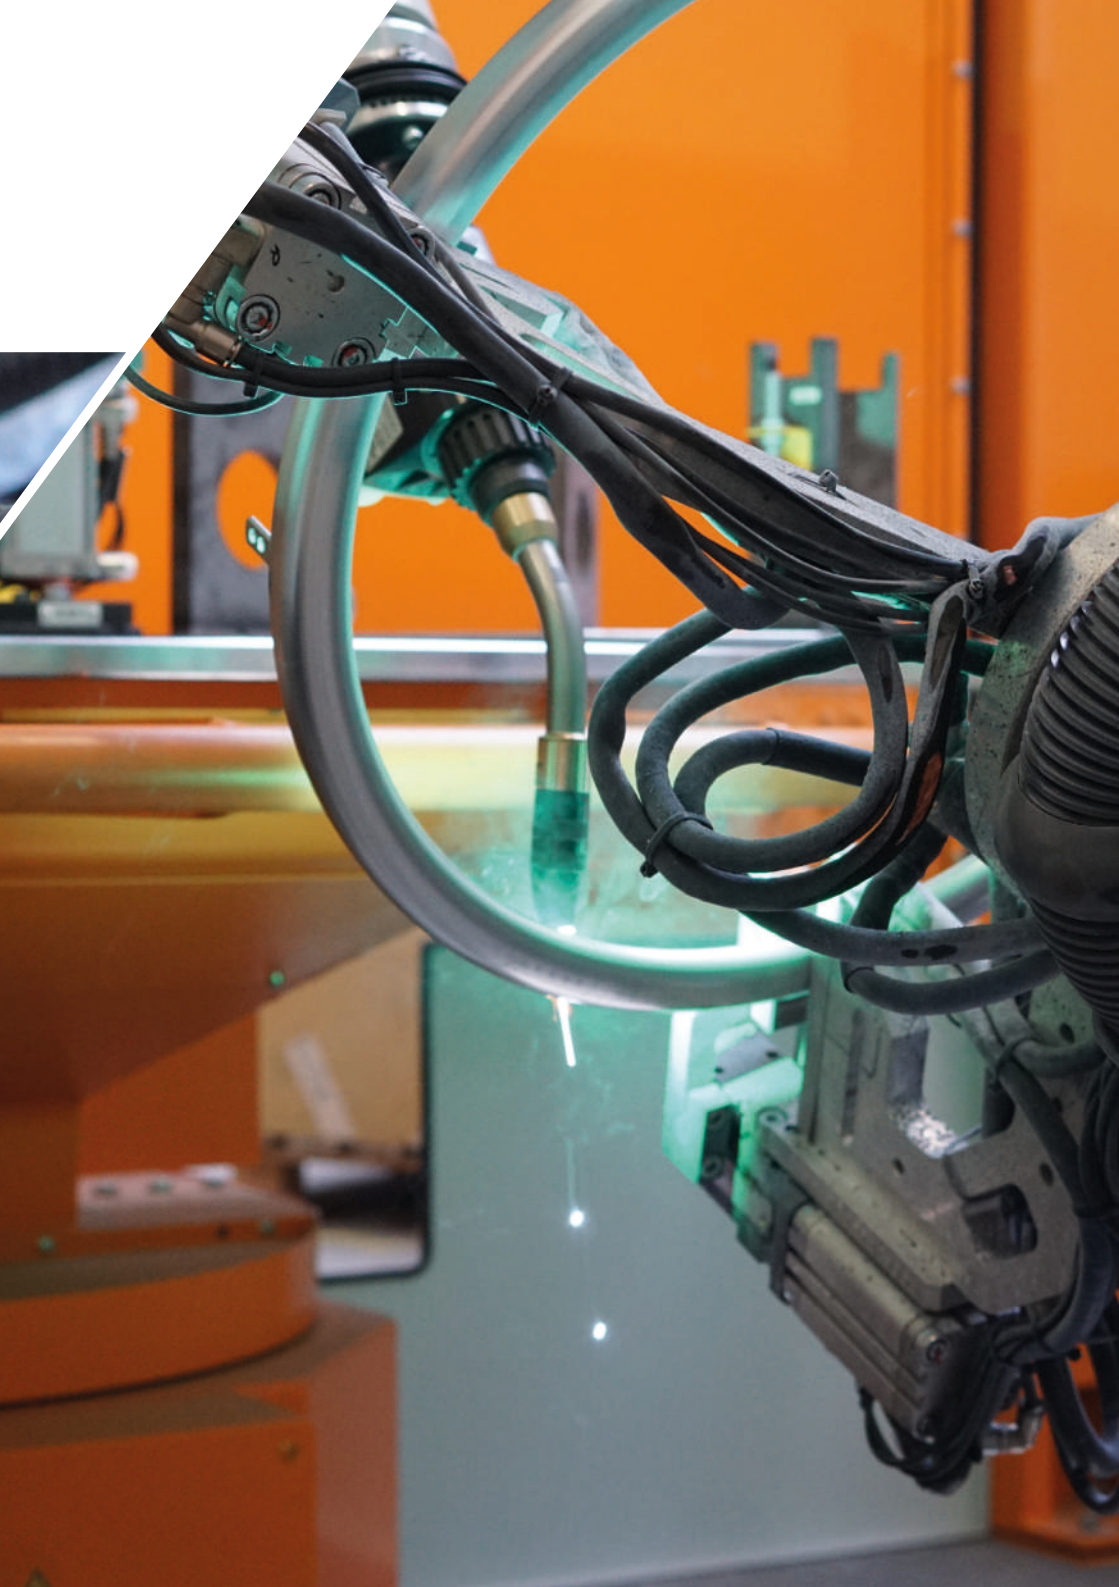

The “USP” of our company, based in Dresden, is bringing together the fields of lightweight construction and rehabilitation technology. Lightweight materials such as Carbon are the foundation of our products.

Our aim is to combine functionality with aesthetic design, because our hand rims are your constant companions all day long. With our experience in lightweight construction we create products that are light, function well and look great.

CURVE & CURVE L

Curve

Curve L

Benefits

The innovative shape of the rim enables the hand to grip efficiently and with control. This means you can transmit maximum power using less energy, whilst keeping the wrist stable. Compared with conventional handrims, the hand muscles tire less quickly, thus reducing the occurrence of cramps and pain (e.g. in carpal tunnel syndrome) and creating a relaxed pushing experience.

Suitable for

wheelchair users with complete hand function.

Recommendation for profile size and coating

To meet different needs, we developed two profile sizes. We designed the 24mm high profile for wheelchair users with smaller hands. The Curve L with a height of 31mm is designed for normal-sized or larger hands. Weighing just 330g or 470g, these are the lightest, most ergonomic push rims in the world made from anodised aluminium.

revolutionary
in design and
ergonomics

GEKKO S & GEKKO

Gekko S

Gekko

Benefits

Perfect ergonomics and excellent grip with low weight make the Gekko a unique, revolutionary handrim. The fully integrated, robust and replaceable silicone strip ensures excellent pushing characteristics of the handrim and offers unparalleled pushing comfort without leaving marks on your skin. In addition, the anodised, low-friction surface on the sides reduces heat generation when braking.

Suitable for

wheelchair users with complete hand function and either complete or limited hand strength.

Recommendation for profile size

We recommend the Gekko S to users with small hands and to children. With these handrims children learn how to push correctly from an early age.

**more grip,
more power**

CURVE TETRA GRIP & CURVE L TETRA GRIP

Curve Tetra Grip

Curve L Tetra Grip

Benefits

This innovative profile is larger than conventional round profiles and offers tetraplegics with triceps function an optimized contact surface for significantly more power through the handrim. As a result, moving the wheelchair on flat terrain and especially uphill requires less effort, while at the same time protecting the joints and ensuring better and safer handling of the wheelchair. In combination with the durable anti-slip coating, the handrims make driving and steering your wheelchair much safer. Due to the even distribution of pressure, the handrim is less prone to heating when the wheelchair is braked.

Suitable for

tetraplegics with triceps function as well as wheelchair users with complete hand function but little hand strength.

Recommendation for profile size

Generally, we recommend using our Curve L Tetra Grip handrim to all tetraplegics with triceps function.

setting
new limits

Benefits

The profile of the Quadro handrim, which is specially adapted to the biomechanics of tetraplegics without triceps function, offers a much larger contact surface than conventional handrims. In combination with the extremely robust anti-slip coating, it provides grip and efficiency during propulsion as well as maximum control when braking and correcting the direction of travel.

Quadro

Suitable for

tetraplegics without triceps function.

GEKKO SPORT

Benefits

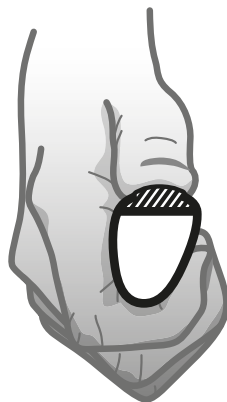

Perfect ergonomics and excellent grip for exceptional wheelchair handling, plus 12 tabs for unbeatable drive wheel stability - all this is combined in the "Gekko Sport"! A big plus for the amateur and professional athlete, when it's all about maximising performance with less pain.

Suitable for

amateur and professional athletes with full hand function and with full or reduced hand strength.

Recommendation

For a wide range of sports, whether self-funded or provided via clubs and teams. (Special club offers may be available).

Blank example
F600 / Carbon Black

Benefits

Our clothing guard blanks are not only universally adaptable to almost any wheelchair, they also set new standards in terms of rigidity, robustness and quality. The innovative processing with carbon design fabric ensures an allround high-quality surface with a brilliant depth effect. With a wide range of color choices, they offer individuality and aesthetics.

Suitable for

Our clothing guard blanks allow individual adaptation to almost any wheelchair. The cutting is uncomplicated and is usually done by the specialist dealer. You will find instructions on our homepage. All clothing guard blanks have a standard fender width of 40mm. In addition, the clothing guard blank F600 in size XL is also available with a fender width of 46mm.

CLOTHING GUARD SOPUR

F600 | Carbon Black

Benefits

Our carbon clothing guard for SOPUR wheelchairs with a rigid or foldable backrest sets new standards in terms of rigidity, robustness, quality and adjustability to the frame size. The innovative use of carbon design fabrics makes for a superior surface quality with a captivating shine and depth effect.

Suitable for

SOPUR wheelchairs with a rigid or foldable backrest.

DISC WHEEL

Beast Disc Wheel DW 20" TL

The first Tubeless Ready disc wheel made of carbon – more robust, lighter, and faster! This is not just any Disc Wheel. It offers propulsion, speed, aerodynamics, light weight, stiffness and greater safety. In short: No compromises. The Tubeless Ready carbon disc wheel from the brand BEAST Components sets new standards in terms of safety, stability and weight. By using the Tubeless Ready technology, with its high quality and robustness, the wheels don't warp or bounce even at very high speeds, and you can take even steep, fast turns without any wheel lag. Because there is no imbalance, it's possible to achieve significantly higher speeds.

The increased safety and the associated minimization of the risk of injury doesn't reduce performance - on the contrary: *"I know I need much less strength to reach the same speed with this wheel, or even to achieve higher speeds, compared to normal wheels. This disc wheel really stands out!"*

Errol Markein | Sunrise Medical.

The company "BEAST Components" was born out of a fascination for carbon as a material, and was founded in 2016 in Dresden, where the company is still based today. Everything is handmade in Germany.

FOOTPLATES & FOOTREST

L: 140 x 190 mm

XL: 140 x 210 mm

Footplates

Our carbon footplates sets new standards in terms of rigidity, robustness and quality. Four different sized blanks guarantee the optimum selection for individual adjustment to any wheelchair with minimal waste.

Footrest

The carbon footrest is designed for sports wheelchairs. The 40mm high edges guarantee a perfect foot position.

SUPPORT GUARANTEE & CRASH REPLACEMENT

The CarboLife promise

We manufacture high-quality products for wheelchairs and also want to guarantee the best possible service and support. That's why we offer the original purchaser of CarboLife Carbon products an industry-leading 5-year warranty and a lifetime crash replacement program for our entire product line.

5-year manufacturer warranty on our carbon products

We stand for quality products "Made in Germany". For this reason we offer a 5-year manufacturer's warranty on our carbon products, against material and manufacturing faults. Product registration on www.carbolife.de within four weeks of the date of purchase is required.

Modified, misplaced, misused, improperly installed or obviously abused CarboLife carbon products are not covered by this warranty. Also, minor everyday damages such as scratches on the surface of our carbon clothing guards are not included in this warranty.

Lifelong crash replacement

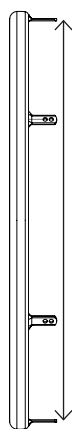

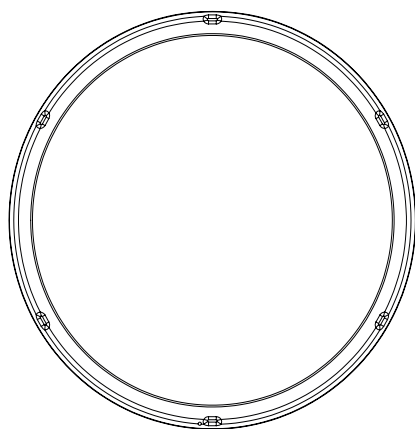

We offer the original owners of our CarboLife products a lifelong crash replacement program that covers all damages outside the warranty, whether self-inflicted or from an external cause. In this case we guarantee a one-time discount of 50 % on our recommended retail price for the purchase of a new CarboLife product.

Please note that VAT, packaging, shipping, installation costs and import duties are not covered. Product registration on www.carbolife.de within four weeks of the date of purchase is required.
